GUI Components

Aim

Develop an application to change the font and color of the text and display toast message when the user presses the button.

Procedure:

- Open Android Studio** and create a new project by selecting **Empty Views Activity**.
- Enter the **application name**, select **Kotlin** as the programming language, choose the minimum **SDK**, and click **Finish**.
- Open the **activity_main.xml** file and design the user interface using a **LinearLayout**.
- Add a **TextView** to display the text “Rajalakshmi Engineering College”.
- Add three **Button** components labeled **Change Font Size**, **Change Font Color**, and **Change Background Color**.
- Set appropriate layout properties such as width, height, margins, text size, and alignment.
- Open **AndroidManifest.xml** and ensure that **MainActivity** is declared as the launcher activity.
- Open **MainActivity.kt** and initialize the **TextView**, **Buttons**, and **Layout** using **findViewById()**.
- Declare Boolean variables to track the changes in font size, font color, and background color.
- Use **setOnClickListener()** for each button to perform the following actions:
 - Change the font size of the text.
 - Change the font color of the text.
 - Change the background color of the layout.
- Display a **Toast message** for each button click to indicate the performed action.
- Save all the files and click **Build → Rebuild Project** to check for errors.
- Select an emulator or connect a physical Android device.

- Click the **Run (►)** button to execute the application.
- Observe the changes in font size, font color, background color, and Toast messages on the screen

AndroidManifest.xml

```
<?xml version="1.0" encoding="utf-8"?>
<manifest xmlns:android="http://schemas.android.com/apk/res/android">

    <application
        android:allowBackup="true"
        android:dataExtractionRules="@xml/data_extraction_rules"
        android:fullBackupContent="@xml/backup_rules"
        android:icon="@mipmap/ic_launcher"
        android:label="@string/app_name"
        android:roundIcon="@mipmap/ic_launcher_round"
        android:supportsRtl="true"
        android:theme="@style/Theme.Kris_21">
        <activity
            android:name=".MainActivity"
            android:exported="true">
            <intent-filter>
                <action android:name="android.intent.action.MAIN" />

                <category android:name="android.intent.category.LAUNCHER" />
            </intent-filter>
        </activity>
    </application>

</manifest>
```

Activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    android:id="@+id/mainLayout"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:orientation="vertical"
    android:padding="16dp"
    android:background="#FFFFFF">

    <TextView
        android:id="@+id/txtCollege"
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:text="Rajalakshmi Engineering College"
        android:textSize="20sp"
        android:textStyle="bold"
        android:textAlignment="center"
        android:textColor="#000000"
        android:padding="16dp"/>

    <Button
        android:id="@+id/btnFontSize"
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:text="Change Font Size"
        android:layout_marginTop="16dp"/>

    <Button
        android:id="@+id/btnFontColor"
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:text="Change Font Color"
        android:layout_marginTop="8dp"/>

    <Button
        android:id="@+id/btnBgColor"
        android:layout_width="match_parent"
```

```
    android:layout_height="wrap_content"
    android:text="Change Background Color"
    android:layout_marginTop="8dp"/>>

</LinearLayout>
```

MainActivity.kt

```
package com.example.kris_21

import android.graphics.Color
import android.os.Bundle
import android.widget.Button
import android.widget.LinearLayout
import android.widget.TextView
import android.widget.Toast
import androidx.appcompat.app.AppCompatActivity

class MainActivity : AppCompatActivity() {

    private var isBigFont = false
    private var isBlueText = false
    private var isBlueBg = false

    override fun onCreate(savedInstanceState: Bundle?) {
        super.onCreate(savedInstanceState)
        setContentView(R.layout.activity_main)

        val txtCollege = findViewById<TextView>(R.id.txtCollege)
        val btnFontSize = findViewById<Button>(R.id.btnFontSize)
        val btnFontColor = findViewById<Button>(R.id.btnFontColor)
        val btnBgColor = findViewById<Button>(R.id.btnBgColor)
        val mainLayout = findViewById<LinearLayout>(R.id.mainLayout)

        // Change Font Size
        btnFontSize.setOnClickListener {
            if (isBigFont) {
                txtCollege.setTextSize = 20f
                Toast.makeText(this, "Font size reset", Toast.LENGTH_SHORT).show()
            } else {
                txtCollege.setTextSize = 28f
                Toast.makeText(this, "Font size increased", Toast.LENGTH_SHORT).show()
            }
            isBigFont = !isBigFont
        }

        // Change Font Color
        btnFontColor.setOnClickListener {
```

```
if (isBlueText) {
    txtCollege.setTextColor(Color.BLACK)
    Toast.makeText(this, "Font color reset", Toast.LENGTH_SHORT).show()
} else {
    txtCollege.setTextColor(Color.BLUE)
    Toast.makeText(this, "Font color changed", Toast.LENGTH_SHORT).show()
}
isBlueText = !isBlueText
}

// Change Background Color
btnBgColor.setOnClickListener {
    if (isBlueBg) {
        mainLayout.setBackgroundColor(Color.WHITE)
        Toast.makeText(this, "Background reset", Toast.LENGTH_SHORT).show()
    } else {
        mainLayout.setBackgroundColor(Color.GREEN)
        Toast.makeText(this, "Background color changed", Toast.LENGTH_SHORT).show()
    }
    isBlueBg = !isBlueBg
}
}
}
```

Output

Result:

The Android application was successfully designed, developed, and executed. On running the application, the text “Rajalakshmi Engineering College” was displayed along with three buttons: Change Font Size, Change Font Color, and Change Background Color.

- When the Change Font Size button was pressed, the font size of the displayed text increased and a Toast message indicating the change was shown.
- When the Change Font Color button was pressed, the color of the text changed and a corresponding Toast message was displayed.
- When the Change Background Color button was pressed, the background color of the application changed and a Toast message confirming the action was displayed.

Thus, the application dynamically modified the text properties and background color based on user interaction and successfully displayed Toast messages for each operation.
